Our Products

Saint Gobain Plain Glass

Clear glass is a transparent glass with no tint produced in the float line. The glass becomes clearer and purer as the iron content decreases. In India, Saint-Gobain plants produce clear glass with low PPM levels of 654 per tonne..

Saint Gobain Mirrors

SGG Miralite-Revolution, is made using a multi-level treatment process and projects authentic and pure reflections that continue to enhance the human spirit.

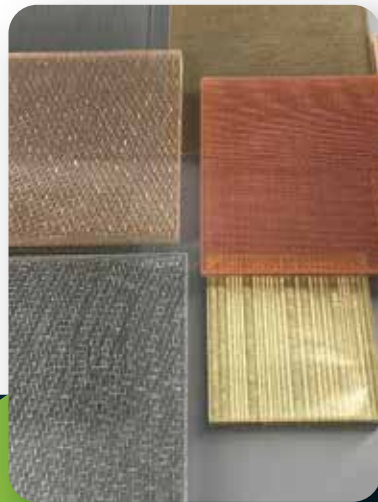

Saint Gobain Toughened Glass

Toughened glass is glass that has undergone controlled heat treatment to increase its strength to It has four times the strength of regular annealed glass.

Lacquered Glass

GPI lacquered glass combines the elegance and depth of glass with the vibrancy of colour and can be used in a variety of ways across the residential and commercial segments.

Laminated Glass

Laminated glass is made up of two pieces of glass joined by a PVB interlayer This interlayer holds the glass in place in the case of a break.

Toughened Glass Doors and Partitions

Glass partition walls may open up a space and create spacious, comfortable workplace settings. Glass partitions are high-quality, non-load-bearing glass panels that serve as effective room dividers.

Shower Enclosures

Discover the timeless pleasure of a luxury bath with world-class shower cubicles from Saint-Gobain that offer matchless performance. Sleek and elegant.

Stained Glass

Stained glass refers to both the material and the artwork made of coloured glass; it has been used in church windows and other major religious construction for over 1000 years.

Designer Glass

Customized Designs ,Customized Patterned, Clustered Glass, Acid Textured Colour Designs combines Different Output designs to outcomes as a Designer Glass

Frosted Glass

Sandblasting or acid etching clear sheet glass produces frosted glass. As a result, one side of the glass pane has a pitted surface, making it translucent. It has an opacity of 10-20%.

Decorative Mirrors

The circular eye-catching art Decorative Wall Mirror Design is made of laser-cut thick Laminated wood that has been painted with high-quality paint and completed with a coat of transparent matte varnish, as well as Saint-Gobain Mirrors.

Designer Mirrors

Designer Mirrors give flair and sophistication to your living area by accentuating your walls. These spectacular items add shine to your house while creating the illusion of space.

LED Mirrors

The spaces you occupy mirror your true personality and your inner wellbeing – they tell the world who you are., very special mirror to capture such a world: Saint-Gobain Illuminated LED Mirrors.

Bevelled Mirrors

A beveled mirror refers to a mirror that has its edges cut and polished to a specific angle and size in order to produce an elegant, framed look.

Tinted Glass

The SGG Parsol is a body-colored glass. It is suited for applications that require an artistic sense. Saint-Gobain Glass employs strict tolerances and strict quality control on its coloured glass.

Reflective One way Glass

Sun Ban is Saint-best-in-class Gobain's residential Solar Control Glass. It lets maximum daylight to pass through while reducing radiation and reflecting up to 70% of heat.

Patterned Window Glass

Patterned glass is a decorative glass with embossed textures or patterns on one or both sides of a glass pane. It transmits light while gently spreading and mixing it perfectly. With any interior design style, both classic and new.

Digital UV Printed Glass

The Glass UV printer is a versatile flatbed unit, suitable for any number of exterior, interior and architectural applications and due to its unique digital print attributes, those applications are now possible and within reach.

Ceramic Printed Glass

Digital ceramic printing on glass is a technological development used for the application of imagery, pattern or text to the surface of flat glass. Like other printing on glass methods, it uses a form of printmaking.

Rainbow Glass

Rainbow glass is glass that displays one of two different colours depending on lighting conditions. The glass is treated with various metal oxides to make it appear to have many colours.

Bend Glass

Bend glass, curved glass is glass that has been reheated and shaped, usually over a metal mold, to a desired bend or curvature, and left to cool in that position

Modular Glass Railing

Modular Glass Railing System come in a variety of designs, bracket types, continuous base profiles, brackets with continuous cover profiles, and coatings like PVDF, powder coating, wood finish, and a variety of colours.

Spider Glass Elevation

Spider Glass Facade is a new alternative for exterior bolted glass assemblies that secures the glazing to a safety net with point-fixings. In between the bolt and the glass, middle elements enable proper stress transfer while ignoring local stresses and an airtight facade.

Digital LED Glass Facade

Convert your glass facade into an in-glass transparent LED building screen. With our interactive media facades, you can turn your Glass Façade into a vast canvas for your imagination.

Switchable Glass

Switchable Glass is a laminated glass made with a liquid crystal film and plastic interlayers. When switched on, the glass becomes transparent when exposed to an electric current.

Electro Tinting Elevation Glass

Tinting Glass Electrochromic Glass is an extremely advanced technical, electrical glass solution suitable for use on a wide range of glass elevations to provide automated solar shading from within the glass unit itself

GPI Magna Glass Board

The GPI Magna Glass Board is a portable, ready-to-use presentation enhancement solution. It has a patented technology and an ultra-slim, highly durable lacquered glass board.

Table Glass Dividers

Table Glass Dividers are used in office working tables to divide employees' work areas. Instead of using wood or acrylic dividers, it will look more visually appealing. It will also be scratch-resistant and water-proof.

Pergola Safety Glass

A pergola is a wooden structure that sits on the roof of a house and provides an extra layer of protection from the elements. This Pergola can be Used in Toughened Glass or Safety Glass instead of Steel or Wood Roof.

Glass Blocks

Glass bricks give optical obscurity while allowing light. Glass blocks are now employed in walls, skylights, and sidewalk lights. They are also used in car park halogen fountains and streetlights. In US, they are called a glass brick.

Our Happy Customers

Here are some of our best projects that we have worked on. We used high-quality materials based on customer needs to articulate a premium look, thereby satisfying our customers.

GLASS POINT INDUSTRIES

Quality is the foundation of our success.
